

NORTHLAND COMMUNITY AND TECHNICAL COLLEGE

2095 LAPTOP COMPUTER

Computer and information technology resources are essential tools in accomplishing the mission of Northland Community and Technical College. Specific programs require all full or part-time students to possess a laptop computer.

The College identifies minimum hardware specifications and general software requirements to accommodate specific program computing activities. Minimum specifications are posted on academic program web pages or available from Information Technology (IT) services. Upon request for Information Technology services, students may be required to provide proof of licensure for software installed on the laptop computer. The College does not endorse or provide technical support for alternate specifications that do not meet minimum requirements.

Students are subject to rights and responsibilities as identified in the 2110 Student Code of Conduct policy and the 5010 Acceptable Use of Computers and Information Technology Resources.
