

# "Share our Passion for Excellence"

## "Passion for Knowledge"

### Demand Flow Technology (DFT)

- Basics of Supply Chain Management Overview
- Execution & Control of Operations Overview
- Detailed Scheduling & Planning
- Production Activity Control
- Capacity Management
- Material Maintenance
- Basic Techniques of Inventory Management
- Inventory Management
- Just-in-Time Manufacturing
- DFT & Capacity Requirements Planning
- Systems & Techniques
- Bar Coding & Data Collection

The 12 modules will promote an employee understanding of Demand Flow Technology (DFT), vocabulary, methods, and techniques as they relate to Production and Inventory Management (PIM). SAP Alliance will be used to aid in the development of curriculum and hands-on simulation and experience.

The goal is to:

- Increase the usage and knowledge of the current Enterprise Resource Planning (ERP) software SAP and DFT
- Create an Electronic Resource Center (ERC) to serve as an ongoing training and facilitation tool
- The development of an internal certification process to assess proficiency of DFT and PIM

## "Passion for Competition"

### The RACE

- Kanban Training
- Six Sigma Problem Solving Techniques
- Process Mapping/Waste Elimination Techniques

The RACE takes the idea of competition and applies it to the company and its' manufacturing processes. The continuous improvement topics apply lecture and theory with production-floor activities, followed up with facilitated project implementation. Using Lean tools, Arctic Cat desires to create a culture of continuous improvement and expand the "sphere of influence" each employee possesses.

## "Passion for Execution"

### American Production & Inventory Control Society

- Execution & Control of Operations
- Detailed Scheduling & Planning
- Strategic Management of Resources
- Basics of Supply Chain Management
- Master Planning of Resources

APICS will provide the availability of a common language that enables Arctic Cat and individuals within, as well as the entire supply chain, to operate more productively and profitably.

**Training benefits:**

- Predict outcomes more accurately and take actions that achieve results
- Contribute to your organization's success through increased efficiency across the processes of the supply chain
- Become an effective, strategic leader
- Meet the expectations of your customers and enterprise
