

Microsoft Products Available

[InfoPath 2007](#)

Office InfoPath 2007 creates rich, dynamic forms that teams and organizations can use to manage forms-driven business processes. Combines the familiar Microsoft Office system environment with Microsoft Office InfoPath Forms Services to deliver effective business form solutions to your organization.

[Groove 2007](#)

Office Groove 2007 is a collaboration software program that helps teams work together more effectively—anywhere, anytime, with anyone. Working in Office Groove 2007 workspaces saves time, increases productivity, and strengthens the quality of team deliverables.

Collaborative workspaces

Create workspaces, add tools and invite team members regardless of location or organization—all without IT assistance.

Document collaboration

Share and revise files with your team members in folders with a familiar organizational structure.

Threaded discussions

Engage with team members in a shared, ongoing conversation on important topics.....and much, much, more!

[OneNote 2007](#)

Office OneNote 2007 is a digital notebook that provides a flexible way to gather and organize any type of information. Includes powerful search capabilities so you can find what you're looking for quickly, and easy-to-use shared notebooks for teams to work together more effectively.

[Visio Professional 2007](#)

Office Visio Professional 2007 is a diagramming and data visualization solution that makes it easy for IT and business professionals to visualize, analyze, and communicate complex information, systems and processes. Visualize information from multiple data sources to better understand current systems and processes, analyze information, and share diagrams for effective and efficient decision-making.

[Project Professional 2007](#)

Office Project Professional 2007 is for more advanced project management and collaboration. This robust project management tool has the right blend of usability, power, and flexibility, so you can manage projects more efficiently and effectively. Office Project Professional 2007 can connect with Microsoft Office Project Server 2007 and includes all the stand-alone functions offered in Office Project Standard 2007.

[Office 2008 for Mac](#)

Office 2008 for Mac is a suite of desktop productivity applications designed to work specifically with the Macintosh operating system. It provides Macintosh users with applications for creating effective documents, sharing ideas with other users on Macintosh computers or Windows-based computers, and managing information efficiently. With its updated user interface and collaborative tools, Office 2008 provides enhanced and more secure capabilities for capturing and using business information.

[SharePoint Designer 2007](#)

Office SharePoint Designer 2007 gives you tools to automate your business processes, build efficient applications on top of the Microsoft SharePoint platform, and tailor your SharePoint site to your needs, all in an IT-managed environment.

[Microsoft Office InfoPath® 2007](#)

Easily create and deploy electronic forms solutions that reduce data reentry and improve the quality of the data collected.

[Microsoft Office Access 2007](#)

Organize and track complex information in a structured way, even with no coding expertise and very limited database knowledge.

[Microsoft Office Excel® 2007](#)

Gain insight from information by using powerful analytical and visualization tools.

[Microsoft Office PowerPoint® 2007](#)

Quickly create dynamic and great-looking presentations.

[Microsoft Office Publisher 2007](#)

Use this complete tool to create, manage, and distribute marketing materials.

[Microsoft Office Word 2007](#)

Create and publish professional documents more easily than ever before.
