

The Course Allocation Report (CAR) Report

Directions / Explanation:

Date of Last Edit: 8/25/2025

- Data is run from ISRS.CT_COU - "Car Report"
- Term to be analyzed **20263** (required for data computation)

- Courses with MDE Codes 0001 or 0002 are removed (Concurrent Enrollment)

- All Locations are included

265 East Grand Forks
303 Thief River Falls
403 Online/Distance
805 Aerospace/Warroad

- CT_COU data is 'pasted' into the 'Nclass' spreadsheet between Columns A and R.
- For each course, calculate the minimum required sections -- the number of sections that would have been required to accommodate the **100%** enrollment of the prior corresponding term. This CARS report can modify the enrollment from 100% to any % of previous term enrollment. If severe increases or declines in enrollment are anticipated, the Allocation can be adjusted here:

Predictive Enrollment Percentage: **70%**

- For each course, the minimum number of sections required for 100% efficiency is subtracted from the number of sections from the previous corresponding term resulting in the number of sections cut from the previous schedule. The sections to be cut are identified by their performance from the previous schedule regardless of location. Beginning with the lowest enrolled sections, Collegewide, sections are removed until the minimum number of sections is reached. For cases in which the final section(s) to be cut cannot be clearly identified due to equal enrollment, all sections of that enrollment are included in the new base schedule.

- Nclass proposes to "Base Line" sections, "Shelve" sections, and to "Watch" sections with low fill rates.

- To help with balancing the schedule, the following is provided:

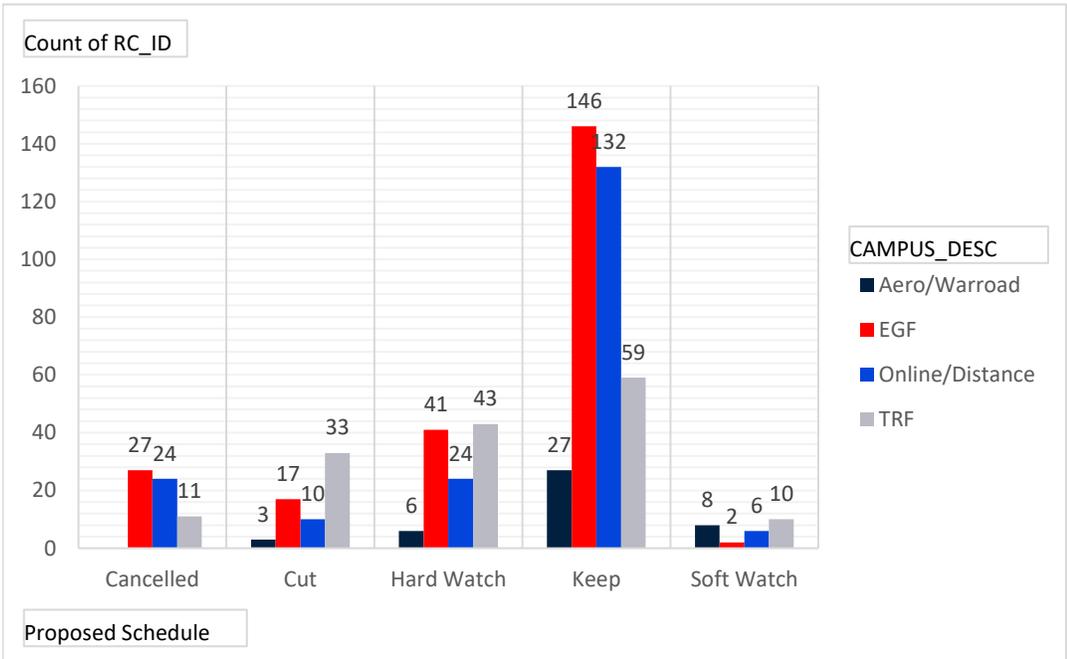

Term Session
Campus
Time of Day

MN Transfer Goal

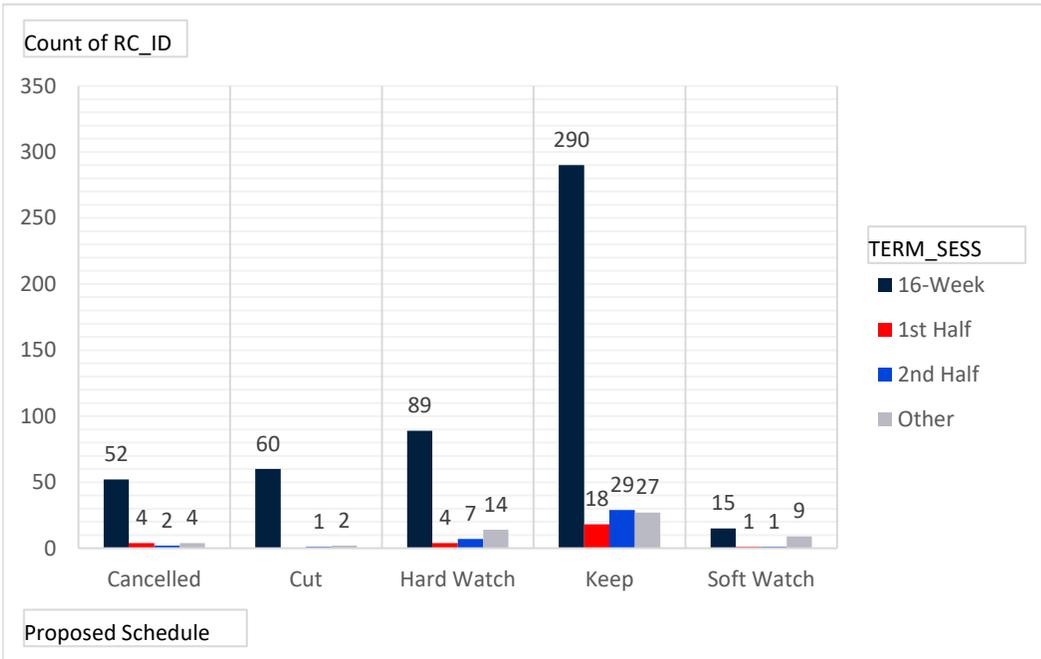

- Nclass compares all sections regardless of term session. Term Sessions (e.g. 16-week) compares only sections with like term sessions

*Original Report created by Dr. Jerrett Dumouchel, Dr. Jeff Hess, Dr. Sheri Litt, Dr. John Wall, and Dr. Dana White
Report Modified for Northland Community and Technical College by Katlyn Tamaalii, Institutional Research*
