

<b>Table: Program Changes Made Based on Aggregated Evaluation Findings</b>					
<b>Item</b>	<b>Date</b>	<b>Trends (Based on Aggregated Data)</b>	<b>Program Change</b>	<b>Rationale</b>	<b>Location of Data</b>
PN Program credits- A & P I & II increasing by 1 credit each.	Fall 2022 start date.	<p>Most 4-year colleges students transfer to have 4 credit A &amp; Ps. NCTC is changing ours to 4 credits to align with this.</p> <p>To prevent increasing our program total credits, faculty determined to make two program changes.</p>	<ol style="list-style-type: none"> <li>1. Do not count NA credits in program total.</li> <li>2. Decrease clinical care II by one credit.</li> <li>3. This in turn resulted in one less point on the eligibility rubric due to the NA change. Instead of 1 point for completion, or .5 points for in progress, it will be Yes or No for the NA course.</li> </ol>	<p>1. 65% of PN students in last 3 years have submitted NA registry documentation vs 3 credit course transfer. Most take the NA registry test or take the course at a facility. Currently a 5-credit course where 1 of the 10 hours is for research, 9 hours on the floor/post conference. The last hour on the floor is quiet and not that beneficial experience wise for SPNs. Facility currently not allowing research the day before due to Covid. So students work more after clinical shift on paperwork. Decrease to 8 hours so entire shift is valued. 7</p>	<p>PN faculty meeting minutes 4.30.21. Advisory committee emails for approval May 2021.</p>
