

# New Items in the EGF Library / 4~15~2022

The following items have recently been added to the library collection.

They are located on the 'New Books' shelves.

The 'New Books' shelves are located near the library staff offices.

**Descriptive summaries are from the item's library record.**

**If you would like something from this list and are not on campus, please e-mail [cynthia.jorstad@northlandcollege.edu](mailto:cynthia.jorstad@northlandcollege.edu) and I'll get the item/s to you.**

<b>New Books</b>		
<i>Non-Fiction</i>		
005.8 Tsa	Tsado, Lucky K. and Robert Osgood	<p><b>Exploring careers in cybersecurity and digital forensics</b></p> <p><i>Exploring Careers in Cybersecurity and Digital Forensics serves as a career guide, providing information about education, certifications, and tools to help those making career decisions within the cybersecurity field.</i></p>
153.42 Pin	Pinker, Steven	<p><b>Rationality: what it is, why it seems scarce, why it matters</b></p> <p><i>Humans today are often portrayed as cavemen out of time, poised to react to a lion in the grass with a suite of biases, blind spots, fallacies, and illusions. But this, Pinker a cognitive scientist and rational optimist argues, cannot be the whole picture. Hunter-gatherers--our ancestors and contemporaries--are not nervous rabbits but cerebral problem-solvers. A list of the ways in which we are stupid cannot explain how we're so smart: how we discovered the laws of nature, transformed the planet, and lengthened and enriched our lives. Indeed, if humans were fundamentally irrational, how did they discover the benchmarks for rationality against which humans fall short? Steven Pinker, the great defender of human progress, having documented how the world is not falling apart, now shows how we can enhance rationality in our lives and in the public sphere. Rationality is the perfect toolkit to seize our own fates</i></p>
174.2 Gil	Gillespie, Ryan	<p><b>Organs for sale: bioethics, neoliberalism, and public moral Deliberation</b></p> <p><i>A study of the bioethical question of how to increase human organ supply. But it is also an inquiry into public moral deliberation and the relationship between economic worth and the value systems of a society. Looking closely at human organ procurement debates, the author offers a critique of neoliberalism in bioethics and asks what kind of society we truly want. While society is directly concerned with the practical question of organ procurement, a better understanding of the rhetoric of advocates and philosophical underpinnings of the debate might indeed improve our public moral deliberation in general and organ policy more specifically. Examining public arguments, this book uses a range of source material, from medical journals to congressional hearings to New York Times op-eds, to provide the most up-to-date and thorough analysis of the topic. [This book] posits that deciding together on the limits of markets, and on what is and ought to be for sale, sheds light on the moral fiber of our society and what it needs to thrive</i></p>
174.9 Eth	Lia, S. Matthew, ed.	<p><b>Ethics of artificial intelligence</b></p> <p><i>Featuring seventeen original essays on the ethics of Artificial Intelligence (AI) by some of the most prominent AI scientists and academic philosophers today, this volume represents the state-of-the-art thinking in this fast-growing field and highlights some of the central themes in AI and morality such as how to build ethics into AI, how to address mass unemployment as a result of automation, how to avoid designing AI systems that perpetuate existing biases, and how to determine whether an AI is conscious. As AI technologies progress, questions about the ethics of AI, in both the near-future and the long-term, become more pressing than ever.</i></p>

179.7 Buc	Buchbinder, Mara	<p><b>Scripting death: stories of assisted dying in America</b></p> <p><i>This growing social and political movement heralds the possibility of a new era of choice in dying. Yet very little is publicly known about how medical aid-in-dying laws affect ordinary citizens once they are put into practice. Sociological studies of new health policies have repeatedly demonstrated that the realities often fall short of advocacy visions, raising questions about how much choice and control aid-in-dying actually affords. Scripting Death chronicles two years of ethnographic research documenting the implementation of Vermont's 2013 "Patient Choice and Control at End of Life" Act. Author Mara Buchbinder weaves together stories collected from patients, caregivers, health care providers, activists, and legislators to illustrate how they navigate aid-in-dying as a new medical frontier in the aftermath of legalization. Scripting Death explains how medical aid-in-dying works, what motivates people to pursue it, and ultimately, why upholding the "right to die" is very different from ensuring access to this life-ending procedure. This unprecedented, in-depth account uses the case of assisted death as an entry point into ongoing cultural conversations about the changing landscape of death and dying in the United States.</i></p>
305.235 Ore	Orenstein, Peggy	<p><b>Boys &amp; sex: young men on hook-ups, love, porn, consent, and navigating the new masculinity</b></p> <p><i>Orenstein uses a mix of anecdote and research to reveal how young men understand and negotiate the new rules of physical and emotional intimacy. Drawing on interviews with young men, psychologists, academics, and experts in the field, Orenstein examines the myriad factors that are shaping boys' ideas of sex, girls, and masculinity including: locker room talk; how the word 'hilarious' robs boys of empathy; pornography as the new sex education; hookup culture and consent; bro culture and #metoo; excessive drinking and frat parties; boys' experience as victims and perpetrators of sexual violence. By exploring the complexity of young men's attitudes, beliefs, and experiences, Orenstein unravels the hidden truths, hard lessons, and important realities of boys' sex lives today. The result is a work that offers a vision of how boys can truly move forward as better men.</i></p>
305.3 Eri	Erickson-Schroth, Laura and Benjamin Davis	<p><b>Gender: what everyone needs to know</b></p> <p><i>Gender is all around us. Beliefs about gender impact our jobs, families, schools, religions, laws, politics, relationships, sports, clothes, and so much more. Gender permeates almost every aspect of our lives as humans. Although this book is part of a series called "What Everyone Needs to Know," it would be impossible to cover everything known about gender in one book, and, since gender is something we all have in common and at the same time all experience differently, a consensus on the "most important" parts of gender differs based on personal experience and interest. In this book we've tried to give you the highlights, so that you can dig deeper on your own if you hit a topic that's interesting to you.</i></p>
305.8 Pro	Lippard, Cameron D., et al, eds.	<p><b>Protecting whiteness: whitelash and the rejection of racial equality</b></p> <p><i>In this volume, leading scholars of race and whiteness assess contemporary shifts in white attitudes about racial justice and racial ideology, illustrating these dynamics with case studies at the personal, ideological, and institutional levels. Clashes such as the standoff with law enforcement at Cliven Bundy's ranch and white nationalist videos on YouTube vividly illustrate the vitality of contemporary racism. Examinations of more easily overlooked, yet also consequential arenas-art museums that enforce their boundaries as elite white spaces, conservative "right on crime" policies that mean new ways of surveillance and punishment for people of color, and settler colonialism in the work of liberal environmental advocacy groups-also give insight into the novel mechanisms and specific ideologies within institutions that reproduce racial inequality. Collectively, this empirically-rich collection helps explicate the racialized fear of change (whether grounded in reality or the imagination) that reinforces the pillars of white supremacy. Contributors also explore, with a critical eye, social movements for racial equality.</i></p>
<p>&lt;&lt; con't next page &gt;&gt;</p>		

305.8 Spa	Jacobs, Walter R., Wendy Thompson Taiwo and Amy August, eds.	<p><b>Sparked: George Floyd, racism, and the progressive illusion</b></p> <p><i>On May 25, 2020, George Floyd, an unarmed Black man, was killed by Minneapolis police officers, sparking months of unrest at home and around the world. As millions took to the streets to express their outrage and speak out against systemic racism, injustice, and institutionalized violence, the city of Minneapolis and its residents were deeply shaken. For many, George Floyd's murder and the ensuing uprisings shattered the city's reputation for progressive ideals and a high quality of life. For many others, the incident simply caught on camera a representation of the harsh realities and paradoxes that they have been living with for generations. In the words of Jasmine Mitchell, "the 'Minnesota nice' comforts and illusionary progressiveness resides upon the ignoring of White racial terrorism and fears of Blackness, brown immigrants, and resistance to White supremacy. Sparked brings together the perspectives of social scientists, professors, and other academics who work or have worked in Minnesota. The essays present reflections on racial dynamics in the Twin Cities and the intersection of the wonderful and wretched sides of that existence, revealing deep complexities, ingrained inequities, and diverse personal experiences.</i></p>
305.809 Saa	Saad, Layla F.	<p><b>Me and white supremacy: combat racism, change the world, and become a good ancestor</b></p> <p><i>When Layla Saad began an Instagram challenge called #meandwhitesupremacy, she never predicted it would become a cultural movement. She encouraged people to own up and share their racist behaviors, big and small. She was looking for truth, and she got it... Thousands of people participated in the challenge, and over 80,000 people downloaded the supporting work Me and White Supremacy. Updated and expanded from the original edition, Me and White Supremacy teaches readers how to dismantle the privilege within themselves so that they can stop (often unconsciously) inflicting damage on people of color, and in turn, help other white people do better, too.</i></p>
305.897 Tre	Treuer, Anton	<p><b>The cultural toolbox: traditional Ojibwe living in the modern world</b></p> <p><i>Today's Ojibwe people have maintained a dazzling array of deep, beautiful, adaptive ways of connecting to the spiritual, natural, and human beings around them. Variations in Ojibwe cultural practices are, of course, as diverse as their homelands, which stretch across the Great Lakes, Canadian shield, pine forests, and prairie potholes of four US states and three Canadian provinces. And Ojibwe culture, like every other culture, has changed over time. But these variations and changes have always followed a distinct path, reflecting an identifiably Ojibwe worldview. While the world around, in, and connected to Ojibwe spaces continues to envelop myriad cultures and peoples, the Ojibwe have found a way to stay recognizable to their ancestors. In this book, Anton Treuer tells stories of one Ojibwe family's hunting, gathering, harvesting, and cultural ways and beliefs - without violating protected secrets. Following the four seasons of the year and the four seasons of life, this intimate view of the Ojibwe world reflects a relatable, modern, richly experienced connection to the rest of the planet. It also opens up a new way of understanding these living traditions, which carry thousands of years of cultural knowledge still in the making.</i></p>
306.44 Mon	Montell, Amanda	<p><b>Cultish: the language of fanaticism</b></p> <p><i>What makes "cults" so intriguing frightening &amp; powerful? The reason why so many of us binge Manson documentaries by the dozen and fall down rabbit holes researching suburban moms gone QAnon is because we're looking for a satisfying explanation for what causes people to join--and more importantly, stay in--extreme groups. We secretly want to know: could it happen to me? In Cultish, Montell argues that the key to manufacturing intense ideology, community, and us/them attitudes all comes down to language. In both positive ways and shadowy ones, cultish language is something we hear--and are influenced by--every single day. Montell exposes the verbal elements that make a wide spectrum of communities "cultish," revealing how they affect followers of groups as notorious as Heaven's Gate, but also how they pervade our modern start-ups, Peloton leaderboards, and Instagram feeds. This take on the curious social science of power and belief will make you hear the fanatical language of "cultish" everywhere.</i></p>
<p>&lt;&lt; con't next page &gt;&gt;</p>		

306.76 D'Em	D'Emilio, John	<p><b>Queer legacies: stories from Chicago's LGBTQ archives</b></p> <p><i>Since 1981, the Gerbert-Hart Library and Archives has been collecting records of lesbian, gay, bisexual, transgender, and queer-identified individuals and organizations. In this book, legendary scholar John D'Emilio draws on those archives to illuminate the scope of people and groups that literally made history. These include publishers, lawyers, athletes, artists, performers, transvestites, bisexuals, and Latinx organizers, to name a few overlapping constituencies. They also include institutions like Dignity, long the primary organization giving voice to LGBTQ Catholics, as well as the Gay Academic Union. In that last case, D'Emilio takes the first steps toward a full history of how scholarly research, writing, and teaching developed and how a visible LGBTQ presence became institutionalized in American higher education. D'Emilio's casual and enthusiastic essays range from politics to culture, from social life to institutions. And though the milieu is Chicago, many of the essays reach beyond to illuminate national events. Overall, this is a kaleidoscopic look at the diverse flavors of organizing and community-making that have been pursued by gay men and women over the decades.</i></p>
306.76 Rob	Robinson, Brandon Andrew	<p><b>Coming out to the streets: LGBTQ youth experiencing homelessness</b></p> <p><i>Lesbian, gay, bisexual, transgender, and queer (LGBTQ) youth are disproportionately represented in the U.S. youth homelessness population. In Coming Out to the Streets, Brandon Andrew Robinson examines their lives. Based on interviews and ethnographic fieldwork in central Texas, Coming Out to the Streets maps the LGBTQ youth's lives prior to experiencing homelessness--within their families, schools, and other institutions--and while they live on the streets, deal with police, and navigate shelters and services for people experiencing homelessness. Through this documentation, Robinson shows how poverty and racial inequality shape how LGBTQ youth experiencing homelessness negotiate their gender and sexuality. Robinson contends that solutions to addressing LGBTQ youth homelessness need to move beyond blaming families for rejecting their child. By highlighting youth's voices, Robinson calls for queer and trans liberation through systemic change.</i></p>
320.01 Sha	Shafik, Minouche	<p><b>What we owe each other: a new social contract for a better society</b></p> <p><i>From one of the leading policy experts of our time, an urgent rethinking of how we can better support each other to thrive. Whether we realize it or not, all of us participate in the social contract every day through mutual obligations among our family, community, place of work, and fellow citizens. Caring for others, paying taxes, and benefiting from public services define the social contract that supports and binds us together as a society. Today, however, our social contract has been broken by changing gender roles, technology, new models of work, aging, and the perils of climate change. What We Owe Each Other identifies the key elements of a better social contract that recognizes our interdependencies, supports and invests more in each other, and expects more of individuals in return. Powerful, hopeful, and thought-provoking, What We Owe Each Other provides practical solutions to current challenges and demonstrates how we can build a better society—together.--</i></p>
321.9 Sny Graphic edition	Snyder, Timothy Nora Krug, illustrator	<p><b>On tyranny: twenty lessons from the twentieth century</b></p> <p><i>Timothy Snyder's New York Times bestseller On Tyranny uses the darkest moments in twentieth-century history, from Nazism to Communism, to teach twenty lessons on resisting modern-day authoritarianism. In this graphic edition, Nora Krug draws from her highly inventive art style in Belonging--at once a graphic memoir, collage-style scrapbook, historical narrative, and trove of memories--to breathe new life, color, and power into Snyder's riveting historical references, turning a quick-read pocket guide of lessons into a visually striking rumination. In a time of great uncertainty and instability, this edition of On Tyranny emphasizes the importance of being active, conscious, and deliberate participants in resistance.</i></p>
<p><b>&lt;&lt; con't next page &gt;&gt;</b></p>		

323.1196 Gre	Green, William D.	<p><b>Degrees of freedom: the origins of civil rights in Minnesota, 1965-1912</b></p> <p><i>Spanning the half-century after the Civil War, Degrees of Freedom draws a rare picture of black experience in a northern state and of black discontent and action within a predominantly white, ostensibly progressive society. William D. Green reveals little-known historical characters among the black men and women who moved to Minnesota following the Fifteenth Amendment; worked as farmhands and laborers; built communities, businesses, and a newspaper; and embodied the slow but inexorable advancement of race relations in the state over time.</i></p>
324.63 Key	Keyssar, Alexander	<p><b>Why do we still have the electoral college?</b></p> <p><i>Every four years, millions of Americans wonder why they choose their presidents through the Electoral College, an arcane institution that permits the loser of the popular vote to become president and narrows campaigns to swing states. Most Americans would prefer a national popular vote, and Congress has attempted on many occasions to alter or scuttle the Electoral College. Alexander Keyssar explains its persistence. After tracing the Electoral College's tangled origins at the Constitutional Convention, he explores the efforts from 1800 to 2019 to abolish or significantly reform it, showing why each has thus far failed. Keyssar examines why reform of the Electoral College has received so little attention from Congress for the last forty years, as well as alternatives to congressional action such as the National Popular Vote Interstate Compact and state efforts to eliminate winner-take-all. In analyzing the reasons for past failures while showing how close the nation has come to abolishing the institution, Why Do We Still Have the Electoral College? offers encouragement to those hoping to produce change in the twenty-first century.</i></p>
325.73 Sze	Szejnert, Malgotzata	<p><b>Ellis Island: a people's history</b></p> <p><i>This is the people's history of Ellis Island: the people who passed through it, and the people who were turned away from it. Szejnert draws on unpublished testimonies, memoirs, archival photographs, and correspondence from many internees and immigrants. At the book's core is a trove of personal letters from immigrants to their loved ones back home-- letters which were confiscated and never delivered, finally discovered in a basement in Warsaw. Szejnert weaves together the personal experiences of forgotten individuals as well as Ellis Island employees. The result is a story of a place and its people, steeped in politics and history, that reshaped the United States.</i></p>
338.7 Ett	Etter, Lauren	<p><b>The devil's playbook: big tobacco, Juul, and the addiction of a new generation</b></p> <p><i>In a deeply reported account, award-winning journalist Lauren Etter tells a riveting story of greed and deception in one of the biggest botched deals in business history. Etter shows how Philip Morris's struggle to innovate left Philip Morris CEO Howard Willard desperate to acquire e-cigarette Juul, even as his own team sounded alarms about the startup's reliance on underage customers. And she shows how Juul's executives negotiated a lavish deal that let them pocket the lion's share of Philip Morris's \$12.8 billion investment while government regulators and furious parents mounted a campaign to hold the company's feet to the fire. The Devil's Playbook is the inside story of how Juul's embodiment of Silicon Valley's "move fast and break things" ethos wrought havoc on American health, and how a beleaguered tobacco company was seduced by the promise of a new generation of addicted customers.</i></p>
362.1 Dut	Dutton, Paul V.	<p><b>Beyond medicine: why European social democracies enjoy better health outcomes than the United States</b></p> <p><i>In this book Paul Dutton argues that Europeans are healthier than Americans because of Europe's historical commitment to improve the social determinants of health. Dutton divides his book into three stages of life: birth and childhood; adulthood and working years; and post-labor market participation or retirement. For each of these phases Dutton compares the U.S. with a different European nation: France for babies and children, Germany for working-age adults, and Sweden for senior citizens.</i></p>

[<< con't next page >>](#)

362.173 Mar	Marquis, Bessie L. and Carol J. Huston	<p><b>Leadership roles and management functions in nursing: theory and application</b></p> <p><i>Equips students for success in the ever-changing, increasingly challenging professional nursing workforce. Current, comprehensive coverage details the responsibilities of high-performing middle- and top-level nursing managers -- from managing conflict and working collaboratively to organizing patient care and staffing. Hundreds of engaging, hands-on learning exercises enhance students' critical-thinking and problem-solving skills and provide them with essential practice in making leadership and management decisions before they enter high-stakes, real-world clinical settings. Updated content equips students with the latest clinical practices and perspectives in quality and safety, the influence and use of technology, healthy workplaces, workplace violence/incivility, quality measurement/benchmarking, healthcare reform/reimbursement, change management, interprofessional teams and more. New evidence-based case studies prepare students to confidently address the growing opioid crisis.</i></p>
362.173 Ma	Mason, Diana J., et al	<p><b>Policy and politics in nursing and health care</b></p> <p><i>Learn how to influence policy and become a leader in today's changing health care environment. Policy &amp; Politics in Nursing and Health Care, 8th Edition helps you develop a global understanding of nursing leadership and political activism, as well as the complex business and financial issues that drive many actions in the health system. Discussions include the latest updates on conflict management, health economics, lobbying, the use of media, and working with communities for change.</i></p>
362.1962 Chr	Christakis, Nicholas	<p><b>Apollo's arrow: the profound and enduring impact of coronavirus on the way we live</b></p> <p><i>A riveting account of the impact of the coronavirus pandemic on American society as it unfolded in 2020, and on how the recovery will unfold in the coming years. Drawing on a combination of fascinating case studies and cutting-edge research from a range of scientific disciplines, the author (physician, and sociologist Nicholas Christakis) explores what it means to live in a time of plague -- an experience that is paradoxically uncommon to the vast majority of humans who are alive, yet deeply fundamental to our species as a whole.</i></p>
370.154 Lan	Lang, James	<p><b>Distracted: why students can't focus and what you can do about it</b></p> <p><i>A decade ago Lang banned cell phones in his classroom, frustrated by how easily they could sidetrack his students. After just a few years, Lang gave in. Not only was his no-cellphones policy ineffective, he realized that like many of his fellow teachers he was missing an important point: The problem isn't phones. It's our antiquated notions of the brain. Here Lang makes the case for a new way of thinking about how to teach young minds based on the emerging neuroscience of attention. What iPhones represent is in principle nothing new, because sustained periods of intense focus are not what humans are good at. We should instead think of it as actively cultivating attention, and find active ways of rethinking classroom conventions that will teach students how to learn.</i></p>
371.39 DeS	De Stefano, Christina	<p><b>The child is the teacher: a life of Maria Montessori</b></p> <p><i>Born in 1870 in Chiaravalle, Italy, Maria Montessori studied until she became a doctor at a time when female graduates in Italy provoked outright scandal. Montessori was struck by the work being done with children from the slums of the San Lorenzo neighborhood, and realized what she wanted to do with her life: change the school, and therefore the world, through a new approach to the child's mind. In spite of the resistance she faced from all sides-scientists accused her of being too mystical, and the clergy of being too scientific-she would garner acclaim and establish the influential Montessori Method, which is now practiced throughout the world. The Child Is the Teacher is the first biographical work on Maria Montessori written by an author who is not a member of the Montessori movement, but who has been granted access to original letters, diaries, notes, and texts written by Montessori herself, including an array of previously unpublished material.</i></p>
<p>&lt;&lt; con't next page &gt;&gt;</p>		

610.028 Cri	Woodruff, David W., ed.	<p><b>Critical care nursing made incredibly easy!</b></p> <p><i>Critical Care nursing is a complex area of practice that not only includes the ICU, but can also include emergency departments and postanesthesia care. Nurses providing critical care treat patients with trauma, medical issues, surgical complications, and many other acute and life-threatening problems. To achieve complete comprehension, the education should be simple, understandable, and useful. Critical Care Nursing Made Incredibly Easy helps to achieve that level of understanding.</i></p>
610.3 Mos		<p><b>Mosby's dictionary of medicine, nursing &amp; health professions</b></p> <p><i>Mosby's Dictionary of Medicine, Nursing &amp; Health Professions, 11th Edition includes more than 56,000 authoritative definitions along with 2,450 illustrations. Appendixes in the book and online make it easy to look up frequently used information. Helping you communicate more effectively in the workplace, this reference is an indispensable reference for students, nurses, and healthcare professionals.</i></p>
610.73 Nur	Gulanick, Meg, ed.	<p><b>Nursing care plans: diagnosis, interventions, &amp; outcomes</b></p> <p><i>Presents a handbook that helps in the creation and customization of effective nursing care plans. Covering the most common medical-surgical nursing diagnoses and clinical problems, this guide features more than 200 care plans, each reflecting the latest evidence-based guidelines and national and international treatment protocols. It also features highlighted QSEN competencies and a clear differentiation of nursing and collaborative interventions. New to this edition are ICNP® diagnoses, care plans on LGBTQ health issues and on electrolytes and acid-base balance.</i></p>
610.73076 Zah 2 copies	Zahler, Kathy A.	<p><b>McGraw-Hill Education 5 TEAS practice tests</b></p> <p><i>No matter how much material you review throughout your preparation for the TEAS, you need the experience of taking a full-length model exam prior to test day. This book provides 5 full-length practice tests modeled closely on the official exam. These tests will give you a clear idea of what to expect on test day.</i></p>
610.73076 Sil	Silvestri, Linda Anne	<p><b>Saunders comprehensive review for the NCLEX-PN examination</b></p> <p><i>Get the best review for the NCLEX-PN exam from the leading NCLEX experts! This text provides everything you need to prepare for success on the NCLEX-PN. The book includes a review of all nursing content areas, more than 4,500 NCLEX exam-style questions, detailed rationales, test-taking tips and strategies, and new Next-Generation NCLEX (NGN)-style questions. An Evolve website simulates the exam-taking experience with a choice of practice questions along with realistic practice tests. Based on Silvestri's proven Pyramid to Success, this complete review is a perennial favorite of students preparing for the NCLEX.</i></p>
610.73073 Sil	Silvestri, Linda Anne	<p><b>Saunders Q &amp; A review for the NCLEX-RN examination</b></p> <p><i>This review offers more than 6,000 test questions, giving you all the Q&amp;A practice you need to pass the NCLEX-RN examination. Each question enhances review by including a test-taking strategy and rationale for correct and incorrect answers. Questions are organized to match the Client Needs and Integrated Processes found in the most recent NCLEX-RN test plan.</i></p>
<p><b>&lt;&lt; con't next page &gt;&gt;</b></p>		

611.0181663 Gre	Greely, Henry T.	<p><b>CRISPR people: the science and ethics of editing humans</b></p> <p><i>Beginning with the amazing tale of the Chinese "CRISPR (Clustered Regularly Interspaced Short Palindromic Repeats) Babies," Greely tells the complex story of human germline editing, covering the science, ethics, law, and politics.</i></p>
612.8 Les	Leschziner, Guy	<p><b>The man who tasted words: a neurologist explores the strange and startling world of our senses</b></p> <p><i>Guy Leschziner explores how our nervous systems define our worlds and how we can, in fact, be victims of falsehoods perpetrated by our own brains. In his moving and lyrical chronicles of lives turned upside down by a disruption in one or more of their five senses, he introduces readers to extraordinary individuals he's worked with in his practice, like one man who actually "tasted" words, and shows us how sensory disruptions like that have played havoc, not only with their view of the world, but with their relationships as well.</i></p>
612.82 Haw	Hawkins, Jeff	<p><b>A thousand brains: a new theory of intelligence</b></p> <p><i>Neuroscientist and computer engineer Jeff Hawkins argues that it's so hard to answer questions about the brain because our basic picture of how the brain works is wrong. In A Thousand Brains, Hawkins takes a radically new approach to the brain, with stunning implications. Hawkins' proposal, called the Thousand Brains Theory of Intelligence, is that your brain is organized into thousands upon thousands of individually computing units, called cortical columns. These columns all process information from the outside world in the same way, and each builds a complete model of the world. But because every column has different connections to the rest of the body, each has a unique frame of reference.</i></p> <p><i>Hawkins is, above all, an engineer, and A Thousand Brains outlines how a new understanding of intelligence could lead to truly intelligent AI. He explores how we might create machines that can learn on their own, why we need not fear superintelligent systems, and how human and machine intelligence may someday merge. Combining cutting-edge theoretical neuroscience with an ambitious program for tomorrow's digital minds, A Thousand Brains heralds a revolution in the study of intelligence. It is a big-think book, in every sense of the word.</i></p>
614.58 Cha	Chakraborty, Arup	<p><b>Viruses, pandemics, and immunity</b></p> <p><i>Informed and accessible overview of viruses and pandemics, how our immune system combats them, and how diagnostic tests, vaccines, and antiviral therapies work to form the foundation of public health.</i></p>
615.1 Nur	Comerford, Karen C. and Mary T. Durkin, eds.	<p><b>Nursing 2022 drug handbook</b></p>
615.8 Sto	Stokker, Kathleen	<p><b>Remedies and rituals: folk medicine in Norway and the New Land</b></p> <p><i>Combing hundreds of original documents and first-hand accounts, the author has created a reference to healing techniques used by rural Norwegians for centuries. Besides older historical data, this book offers a chapter that features home remedies remembered by midwestern Norwegian Americans in the 20th century.</i></p>
615.102 Val	Vallerand, April Hazard	<p><b>Davis's drug guide for nurses</b></p>
<p>&lt;&lt; con't next page &gt;&gt;</p>		

616.044 Lus	Lustig, Robert H.	<p><b>Metabolical: the lure and the lies of processed food, nutrition, and modern medicine</b></p> <p><i>Dr. Robert Lustig explains the eight pathologies that underlie all chronic disease, and how they are not 'druggable,' but how they are 'foodable'--meaning, medication can't cure what nutrition can--by following two basic principles: protect the liver and feed the gut.</i></p>
626.075 Lee	Leeuwen, Anne M. and Mickey Lynn Bladh	<p><b>Davis's comprehensive manual of laboratory and diagnostic tests with nursing implications</b></p>
700.103 Pai	Painter, Chad and Lee Wilkins	<p><b>Entertaining ethics: lessons in media ethics from popular culture</b></p> <p><i>This book examines core concepts like truth-telling, loyalty, privacy, public service, media economics, social justice, advocacy, and accountability through the lens of popular films, television shows, and music.</i></p>
741.5 Drn Graphic Novel	Drnaso, Nick	<p><b>Beverly</b></p> <p><i>The modern lost souls of Beverly struggle with sexual anxieties that are just barely repressed and social insecurities that undermine every word they speak. Time passes, bodies change sizes, realities blur with fantasies, truths disintegrate, childhood comforts turn uncomfortable. Again and again, the civilized façades of Nick Drnaso's pitch-perfect suburban landscapes crack in the face of violence and quiet brutality. Drnaso's debut graphic novel leaves you haunted and squirming and longing for more.</i></p>
741.5 Bag Graphic Novel	Bagge, Peter	<p><b>Everybody is stupid except for me and other astute observations</b></p> <p><i>This collection of material from Reason magazine presents Bagge's political and social commentary on both a national and local Seattle scale. He focuses on such topics as civil liberties, homelessness, and political campaigns.</i></p>
808.06 Feb	Febos, Melissa	<p><b>Body work: the radical power of the personal narrative</b></p> <p><i>Drawing on her own experiences, the author of the critically acclaimed memoir "Whip Smart" discusses how to confront the emotional, psychological, and physical work of writing about our most intimate lives.</i></p>
810.9 Per	Perkins, Nichole	<p><b>Sometimes I trip on how happy we could be: essays</b></p> <p><i>Examining pop culture's impact on her life, Nichole Perkins takes readers on a rollicking trip through the last twenty years of music, media and the internet from the perspective of one southern Black woman. She explores her experience with mental illness and how the TV series Frasier served as a crutch, how her role as mistress led her to certain internet message boards that prepared her for current day social media, and what it means to figure out desire and sexuality and Prince in a world where marriage is the only acceptable goal for women.</i></p> <p><i>Combining her sharp wit, stellar pop culture sensibility, and trademark spirited storytelling, Nichole boldly tackles the damage done to women, especially Black women, by society's failure to confront the myths and misogyny at its heart, and her efforts to stop the various cycles that limit confidence within herself. By using her own life and loves as a unique vantage point, Nichole humorously and powerfully illuminates how to take the best pop culture has to offer and discard the harmful bits, offering a mirror into our own lives.</i></p>

818.603 May	May, Katherine	<p><b>Wintering: the power of rest and retreat in difficult times</b></p> <p><i>An intimate, revelatory book exploring the ways we can care for and repair ourselves when life knocks us down. Sometimes you slip through the cracks: unforeseen circumstances like an abrupt illness, the death of a loved one, a break up, or a job loss can derail a life. These periods of dislocation can be lonely and unexpected. For May, her husband fell ill, her son stopped attending school, and her own medical issues led her to leave a demanding job. Wintering explores how she not only endured this painful time, but embraced the singular opportunities it offered. A moving personal narrative shot through with lessons from literature, mythology, and the natural world, May's story offers instruction on the transformative power of rest and retreat. Illumination emerges from many sources: solstice celebrations and dormice hibernation, C.S. Lewis and Sylvia Plath, swimming in icy waters and sailing Arctic seas. Ultimately Wintering invites us to change how we relate to our own fallow times. May models an active acceptance of sadness and finds nourishment in deep retreat, joy in the hushed beauty of winter, and encouragement in understanding life as cyclical, not linear. A secular mystic, May forms a guiding philosophy for transforming the hardships that arise before the ushering in of a new season.</i></p>
940.54 Blu	Blume, Lesley M.	<p><b>Fallout: the Hiroshima cover-up and the reporter who revealed it to the world</b></p> <p><i>Just days after the United States decimated Hiroshima and Nagasaki with nuclear bombs, the Japanese surrendered unconditionally. But the US government and military had begun a secret propaganda and information suppression campaign to hide the devastating nature of these experimental weapons. Occupation forces closed the atomic cities to Allied reporters, preventing leaks about the horrific long-term effects of radiation which would kill thousands during the months after the blast. For nearly a year the cover-up worked-- until New Yorker journalist John Hersey got into Hiroshima and managed to report the truth to the world. Blume shares this piece of hidden history, and shows how this knowledge has remained among the greatest deterrents to using nuclear weapons since the end of World War II.</i></p>
977.6 Min	Scott, Anthony R. and Dr. Chaunda L. Scott, eds.	<p><b>Minnesota's Black community in the 21<sup>st</sup> century</b></p> <p><i>Minnesota's Black Community in the 21st Century shines a spotlight on African American individuals and organizations who are helping to build a better Minnesota. This book highlights the contributions of contemporary black Minnesotans in the fields of the arts, beauty and fashion, community service, education, entertainment, finance, government, labor, law and law enforcement, media and communications, medicine and health care, religion, social services, sports, science and technology, and more.</i></p>
977.6 Tay	Taylor, David Vassar	<p><b>African Americans in Minnesota</b></p> <p><i>African Americans have had a profound influence on the history and culture of Minnesota from its earliest days to the present. Author David V. Taylor chronicles this rich story, using first-person accounts, newspaper articles, and a careful analysis of census records. During the territorial and early statehood periods, blacks developed communities in St. Paul, Minneapolis, and Duluth, as well as rural areas, and established churches, businesses, and social organizations. Taylor recounts the triumphs and struggles of African Americans over the last two hundred years in a clear and concise narrative. He also introduces influential and notable people including fur trader George Bonga, newspaper editors John Quincy Adams and Cecil Newman, lawyer Fredrick L. McGhee, social workers Gertrude Brown and I. Myrtle Carden, labor activist Nellie Stone Johnson, inventor Frederick McKinley Jones, and artists August Wilson, Lou Bellamy, and Prince.</i></p>
